Errata

The Soldier and Biological Chemical Command (SBCCOM) is referred to throughout this Programmatic EIS; however, it was deactivated in October 2003. The research and development functions of SBCCOM were incorporated into the Research Development and Engineering Command (RDECOM). The Edgewood Chemical and Biological Center (ECBC) is also now a part of RDECOM.

1. BACKGROUND AND PURPOSE

1.1 Background

This Stakeholder Interaction and Public Involvement Plan (the plan) is intended to describe the stakeholder and public information, outreach, and involvement activities being conducted in support of the programmatic environmental impact statement (PEIS) being prepared by the Army on the Chemical and Biological Defense Program (CBDP)—the *Chemical and Biological Defense Program Programmatic Environmental Impact Statement (CBDP PEIS)*. Public involvement is required by the National Environmental Policy Act (NEPA) of 1969 and is mandated in regulations promulgated by the Council on Environmental Quality. In addition, Department of Defense (DoD) and Army guidance require public involvement during environmental actions. This plan complies with any service- or installation-specific guidance for public involvement during NEPA actions.

In July 1998, the Deputy Assistant to the Secretary of Defense for Counterproliferation and Chemical and Biological Defense, Mr. Walter L. Busbee, issued a memorandum directing a reexamination of the *Biological Defense Research Program Final PEIS* of April 1989. This prompted the initiation of the Biological Defense Research, Development, and Acquisition Programs Environmental Assessment project.

Subsequently, this project was expanded when, after Dr. Johnson-Winegar's consideration of the environmental documentation, the Deputy Assistant to the Secretary of Defense for Chemical and Biological Defense (DATSD(CBD)) directed that new NEPA documentation be prepared in the form of a PEIS encompassing DoD's coordinated CBDP. More details are provided in an Information Paper (Attachment A) in the Reference section of this plan.

The technical approach and public involvement activities for the *CBDP PEIS* were directed and validated by an Integrated Product Team (IPT) formed by the DATSD(CBD). The IPT includes senior personnel from DoD and the services and is chaired by the Deputy Assistant Secretary of the Army (Environment, Safety, and Occupational Health) (see Attachment B, *CBDP PEIS* IPT Charter). The Assistant Secretary of the Army for Acquisition, Logistics, and Technology is the approval authority for the *CBDP PEIS*.

The *CBDP PEIS* assesses the potential environmental impacts associated with the execution of an integrated CBDP designed to protect our soldiers, sailors, marines, and airmen from the evolving chemical and biological (CB) threats they may encounter on the battlefield. It creates an overarching framework that will continue to ensure fully informed government decision making within this program and provide a single, up-to-date information resource for the public.

The CBDP consists of research, development, and acquisition activities in support of its mission, which is to allow U.S. military forces to survive and successfully complete their operational missions in battlespace environments that are or may be contaminated with CB warfare (CBW) agents. Each of the military services, the Defense Advanced Research Projects Agency, and the Joint Program Executive Office for Chemical and Biological Defense conduct CBDP activities. The sites for execution of these activities are located at numerous military installations and contractor facilities throughout the United States.

1.2 Proposed Action and Alternatives

The *CBDP PEIS* describes and evaluates the impacts of the proposed action and other alternatives on environmental conditions, health and safety, cultural and natural resources, socioeconomics, and environmental justice.

The proposed action consists of the execution of an integrated CBDP designed to protect our soldiers, sailors, marines, and airmen from evolving CB threats they may encounter on the battlefield.

The No Action Alternative, required by NEPA, is defined as continuing the current CBDP operations as described in and covered by existing environmental analyses. No other alternatives were identified in the scoping process.

The Notice of Intent (NOI) provides additional information (Attachment H).

1.3 Purpose

The CBDP IPT is committed to providing information and opportunities for involvement for anyone interested in the outcome of this PEIS and in the CBDP as a whole. In keeping with that commitment, this plan has been developed to delineate the approach and activities designed to achieve the IPT's objectives. These activities not only meet the minimum requirements of NEPA, but in addition provide many early opportunities for information sharing and public involvement.

The overall purpose of the activities in this plan is to:

- provide useful, understandable, and easily accessible information about the CBDP and the PEIS to stakeholders and the public, and
- encourage and facilitate public involvement by providing interaction opportunities for stakeholders and the public to participate in the NEPA process.

The plan establishes a strategic approach for communication and involvement activities that will occur during the time from the NOI publication to the Record of Decision (ROD) issuance. The nature of a strategic plan is to easily accommodate evolving goals and objectives by phasing implementation and taking advantage of lessons learned along the way. The plan will be updated, as needed, as input is received from project proponents and stakeholder and public interactions.

2. ASSUMPTIONS

2.1 General Assumptions

For the purposes of this plan, the following assumptions have been made:

- The group of interested parties named **stakeholders** will comprise representatives of the DoD, military services, federal agencies, installation personnel, elected officials, regulatory agencies, Tribal governments, and other groups who may have a stake in the outcome of the PEIS.
- The group of interested parties named the **public** will comprise members of advocacy groups, environmental organizations, and the general public.
- The baseline for stakeholder interactions and public involvement will be NEPA regulatory requirements.
- The *CBDP PEIS* IPT will play a key role in identification of stakeholders and the public in their respective locations.
- Installation commanders, their public affairs staff, and other involved site personnel will play a major role in interactions with and identification of stakeholders and the public at their sites.
- Due to the heightened sensitivity toward CB matters of stakeholders and the public in the communities where CBDP activities take place, it is anticipated that, at least initially, there will be an interest in this PEIS. (This assumption proved inaccurate as only one public comment and one stakeholder comment were received during scoping.)
- Early discussions with stakeholders will be important to help determine the nature and frequency of public information, outreach, and involvement activities.
- Proactive communications with both stakeholders and the public early in the process will identify potential issues and alleviate unnecessary concern. (No new issues for consideration were identified during scoping.)
- The Internet will be used throughout the process as a means of communicating with stakeholders and the public.

2.2 Stakeholder Groups

Initial assumptions were made regarding the people and agencies likely to have an interest in the *CBDP PEIS*. Logical groupings of potential stakeholders and the public were developed. As the plan was implemented, some activities were directed toward specific groups, and others were directed toward the entire audience of *CBDP PEIS* stakeholders and the public.

Group 1 – Headquarters Level

- Defense Advanced Research Projects Agency
- Department of Defense Public Affairs Office
- Department of Defense Office of General Counsel
- Office of the Assistant Secretary of the Army (Acquisition, Logistics, and Technology)
- Office of the Assistant Secretary of the Navy (Research, Development, and Acquisition)
- United States Marine Corps

- Office of the Deputy Assistant Secretary of the Army (Environment, Safety, and Occupational Health)
- Office of the Deputy Assistant Secretary of the Air Force (Environment, Safety, and Occupational Health)
- Joint Program Executive Office for Chemical and Biological Defense
- Army Public Affairs Office Chief
- Army Office of General Counsel
- Office of Congressional Liaison (Army)
- U.S. Army Medical Research and Materiel Command
- U.S. Army Test and Evaluation Command
- U.S. Army Soldier and Biological Chemical Command
- Office of the Deputy Assistant to the Secretary of Defense (Chemical and Biological Defense)
- Office of the Deputy Under Secretary of Defense (Environmental Security)
- Office of the Director for Environmental Policy (Army)
- Office of the Surgeon General (Army)
- Office of the Deputy Chief of Staff for Programs
- Office of the Judge Advocate General (Environmental Law Center)
- Congressional Representatives (see Attachments C and I)
- Others as identified

Group 2 – Installation Level

- Installation Commanders for example sites (see Attachment D, Mailing Lists to Example Sites)
- Commanders/Directors of *CBDP PEIS* example site activities (see Attachment D)
- Public Affairs Officers at example sites (see Attachment D)
- Example site points of contact
- Tribal governments (see Attachment E, Example Site Outreach Mailing Lists)
- Others as identified

Group 3 – Federal Agencies

- U.S. Environmental Protection Agency
- Council on Environmental Quality
- Centers for Disease Control and Prevention
- Federal Emergency Management Agency
- U.S. Food and Drug Administration
- Department of the Interior
- Others as identified (see Attachment F, Federal Entity Mailing List)

Group 4 – Special Interest Groups

- Restoration Advisory Boards (RABs)
- Foundation on Economic Trends
- Downwinders
- Citizen Soldier
- Sierra Club
- Others as identified (see Attachment E, Example Site Outreach Mailing Lists)

Group 5 – General Public

- Chambers of Commerce
- Others as identified (see Attachment E, Example Site Outreach Mailing Lists)

Group 6 – Media

- Newspapers serving example sites (see Attachment G, List of Newspapers)

2.3 Public Involvement Phases

Finally, the assumption was made that the approach to planning interactions with stakeholders and the public would be flexible. The development of this plan was an iterative process based on input received during early discussions and scoping; in fact, the plan remained a living document throughout the NEPA process. In its final form, it tells the story of public involvement in the *CBDP PEIS* and becomes part of the final document.

The plan is segmented into phases that are determined by significant milestones within the PEIS process. Using a phased approach allows incorporation of new information and lessons learned into subsequent phases.

The three phases are:

- The **scoping period**, from publication of the NOI through the close of the scoping period.
- The **Draft PEIS**, from the conclusion of scoping through the public comment period for the Draft PEIS.
- The **Final PEIS and ROD**, from the close of the comment period on the Draft PEIS through the ROD.

Section 4, later in the plan, details activities.

3. KEY MESSAGES

As the *CBDP PEIS* process evolved, key messages and relevant technical content were integrated into information and outreach materials and activities.

3.1 Initial Key Messages*

- DoD is committed to fully informing and involving stakeholders and members of the public in the *CBDP NEPA* process.
- The *CBDP* is essential to the survival and success of American forces in battlespace environments that are or may be contaminated with CBW agents.
- DoD requires a baseline against which potential public health and safety and environmental impacts can be assessed; DoD is committed to protecting public health and safety and the environment.
- The *CBDP PEIS* will provide a framework from which the military services may tier *NEPA* documentation covering future activities, gaining efficiency, as well as saving time and money.

** Key messages may be expanded depending on input from IPT and information gathered during early notification and scoping.*

4. APPROACH

4.1 Phase 1 – Scoping

Section 5, Communication Activities, details a number of stakeholder and public information, outreach, and involvement activities that were conducted during the time from the NOI publication (see Attachment H) to the close of the scoping period (4 June 2001 through 14 September 2001).

The focus of the approach for this phase of the process was to provide many different information opportunities to all target groups. The objective of these opportunities was to disseminate as much information as possible to help stakeholders and the public determine the extent to which they wanted to be involved as the PEIS moved forward.

The components of the plan for Phase 1 were:

- Establish the public Internet site for the project (<http://chembioeis.detrack.army.mil>).
- Prepare a government information package.
- Prepare a public information package.
- Disseminate the information packages to members of Groups 1 and 2 (see Attachments C and D).
- Publish the NOI (see Attachment H). Place the NOI on public and government environmental websites (<http://www.denix.osd.mil/denix/public/news/army/noi/noticeofintent.html> and <https://www.denx.osd.mil/denix/dod/dod.html>).
- Concurrent with the NOI appearance in the *Federal Register*, publish display advertisements in local newspapers announcing the project (see Attachment G – List of Newspapers).
- Concurrent with publication of the NOI, direct mailing of announcements to federal entities, stakeholders, public entities, special interest groups, and potentially impacted Indian tribal groups (see Attachments D, E, and F).
- Provide updates to local organizations, as necessary.

4.2 Phase 2 – Draft PEIS

Based on the extremely small response from the public during the scoping activities, public interest in the Draft PEIS was anticipated to be limited. In compliance with NEPA, the Draft PEIS was sent to local libraries and submitted to federal and state agencies, potentially impacted Indian tribal groups, citizen advisory groups, and interested members of the public for their review and comment.

The components of the plan for Phase 2 were:

- Submit information to interested members of Congress (see Attachment I).
- Publish Draft PEIS Notices of Availability (NOA) (see Attachment J). Place NOA on public and government environmental websites.

- Concurrent with NOA publication in the *Federal Register*, publish display advertisements in local newspapers announcing availability and contact information (see Attachment K – Revised List of Newspapers).
- Concurrent with NOA publication, placement of Draft PEIS at local libraries (see Attachment L – List of Libraries).
- Delivery of the Draft PEIS to federal and state agencies, potentially impacted Indian tribal groups, citizen advisory groups, and individual requestors (see Attachment M).
- Direct announcement to potential public interest groups and example site representatives (see Attachments N and O).
- Maintenance of public Internet site for public response receipt and information dissemination.

4.3 Phase 3 – Final PEIS and ROD

Limited comments were received during the Draft PEIS public comment period (5 May 2003 – 13 August 2003). The Final PEIS addresses and incorporates the comments received during this period (see Attachment B to the CBDP PEIS). The plan for disseminating the Final PEIS will closely mirror that followed for the Draft PEIS in Phase 2.

The components of the plan for Phase 3 are:

- Submit information to interested members of Congress (Attachment I).
- Publish Final PEIS Notice of Availability (NOA). Place NOA on public and government environmental websites.
- Concurrent with NOA publication in the *Federal Register*, publish display advertisements in local newspapers announcing availability and contact information (see Attachment K – Revised List of Newspapers).
- Concurrent with NOA publication, placement of Final PEIS at local libraries (see Attachment L – List of Libraries).
- Delivery of the Final PEIS to federal and state agencies, potentially impacted Indian tribal groups, citizen advisory groups, and individual requestors (see Attachment M).
- Direct announcement to potential public interest groups and example site representatives (see Attachments N and O).
- Maintenance of public Internet site for public response receipt and information dissemination.

5. COMMUNICATION ACTIVITIES

5.1 Communication Approach

When planned and implemented carefully and consistently, communication activities during a NEPA action can go a long way toward increasing public awareness, disseminating accurate information, correcting misperceptions, and helping stakeholders and the public make informed decisions about their desired level of involvement.

The communication activities for the *CBDP PEIS* were designed to provide information early in the process to as wide an audience as possible. The premise was that an “early and often” approach would create a sense of familiarity and understanding of the CBDP and the PEIS process, thus allaying unnecessary or unwarranted concerns about the nature of the CBDP.

There were two basic audiences for this effort. The first was internal, more “governmental” in nature, including the military services, federal agencies, and elected officials. Groups 1 through 3 comprised this internal audience. The IPT membership came from Group 1. The second audience is external, more “general public” in nature. Groups 4 and 5 comprise the external audiences. Group 6 is the media, to include print and electronic outlets.

In general, members of the IPT and the technical team accomplished communications with the internal audiences. Existing institutional communication channels including electronic mail, briefings, meetings, and information sharing were a component of the technical work on the PEIS and supported communications. The external audiences are not so easily captured and required a different approach.

To facilitate the ability to communicate effectively with external audiences, early and continued involvement was sought from installation commanders, their public affairs officers, and other involved site personnel. Seeking the support of installation personnel enabled the CBDP team to capitalize on their experience and knowledge of issues, interests, and concerns specific to the area. Use of local resources enhanced credibility from the beginning.

Using the local media to inform and educate the public about the *CBDP PEIS*, and the CBDP in general, was considered to be an effective tool to build public trust and credibility. Research shows that local and regional media outlets are a trusted source of information. Communication activities focused on the media centered on publications in local newspapers.

5.2 Communication Activities

The following matrix (**Figure A-1**) identifies communication activities, along with target groups, purpose, and strategy.

Programmatic Environmental Impact Statement

ACTIVITY	TARGET GROUP(S)	PURPOSE	TACTICS
Scoping Phase			
Establish public Internet site	All	Provide information throughout project	Announcements; public involvement information; source for all project information and documents; links to relevant sites
Prepare and mail internal information package	1, 2, 3	Initial information	Copy of letter from Winegar-Johnson; NOI; information paper; schedule; technical approach
Prepare public information package	2, 4, 5	Begin public education process	Fact sheets (e.g., NEPA, CBDP Q&As); PEIS schedule; points of contact; e-mail address; Internet site address
Publish NOI	All	Meet NEPA requirements	<i>Federal Register</i>
Publish display ad in site newspapers (concurrent with NOI)	2, 4, 5, 6	Public notification	Display ad in Metro or Local section will announce NOI, provide telephone numbers, e-mail address, and Internet site address
Update local organizations, as required	2, 4, 5, 6	Build public awareness and understanding	Presentations to local government, civic groups, RABs, others as appropriate
Draft PEIS			
Publish NOA (DPEIS)	All	Meet NEPA requirement	<i>Federal Register</i>
Publish display ads in local newspapers (concurrent with NOA)	2, 4, 5, 6	Public notification	Display ads will announce NOA and provide contact information
Direct mailings to installation personnel, special interest groups, and general public	2, 4, 5	Public notification	NOA, comment outreach, and contact information
Direct mailings to stakeholder federal and state agencies, Indian tribal groups, and citizen advisory groups	1, 2, 3, 4	Federal stakeholder information	Draft PEIS, comment outreach, and contact information
Placement in local libraries	2, 4, 5	Provide information, easy access	Draft PEIS, comment outreach, and contact information
Maintain and monitor public Internet site	All	Provide information, easy access, and timely feedback	Draft PEIS and other project information; tool for submitting comments electronically

Figure A-1. Communication Activities

Programmatic Environmental Impact Statement

Final PEIS and ROD			
Publish NOA (FPEIS)	All	Meet NEPA requirement	<i>Federal Register</i>
Publish display ads in local newspapers (concurrent with NOA)	2, 4, 5, 6	Public notification	Display ads will announce NOA and provide contact information
Direct mailings to installation personnel, special interest groups, and general public	2, 4, 5	Public notification	NOA, comment outreach, and contact information
Direct mailings to stakeholder federal and state agencies, Indian tribal groups, and citizen advisory groups	1, 2, 3, 4	Federal stakeholder information	Draft PEIS, comment outreach, and contact information
Placement in local libraries	2, 4, 5	Provide information, easy access	Final PEIS, comment outreach, and contact information
Maintain and monitor public Internet site	All	Provide information, easy access, and timely feedback	Draft PEIS and other project information; tool for submitting comments electronically
Publish NOA (ROD)	All	Meet NEPA requirement	<i>Federal Register</i>

3 November 2000

INFORMATION PAPER

SUBJECT: *Chemical and Biological Defense Program Programmatic Environmental Impact Statement (CBDP PEIS)*

1. Purpose: To provide information on the background and status of the *CBDP PEIS* project.
2. Facts:
 - a. In 1989, the *Biological Defense Research Program Final Programmatic Environmental Impact Statement (BDRP FPEIS)* was completed. The *BDRP FPEIS* was undertaken as the result of litigation initiated by The Foundation on Economic Trends (FOET) in September 1986. FOET subsequently filed a new lawsuit that resulted in 1991 in the requirement for environmental assessments (EAs) on all then-current and proposed projects involving biosafety level-3 or level-4 containment.
 - b. In a memorandum to the Assistant Secretary of the Army for Installations, Logistics, and Environment, dated 15 July 1998, the Deputy Assistant to the Secretary of Defense for Counterproliferation and Chemical/Biological Defense (DATSD(CP/CBD)) restated the Army's executive agency responsibility for the Department of Defense (DoD) Biological Defense Research, Development, and Acquisition Programs (BDRDAP) and tasked the Army to assess and document the potential environmental impacts of the BDRDAP via a reexamination of the *BDRP FPEIS*.
 - c. The U.S. Army Medical Research and Materiel Command (USAMRMC) initiated a project to complete the BDRDAP EA in the spring and summer of 1999. An Integrated Product Team (IPT) was formed, met, and approved a charter; a data call was issued; a strawman approach was developed; and the Assistant Secretary of the Army for Acquisition, Logistics, and Technology assumed responsibility as the approval authority for the BDRDAP EA.
 - d. In January 2000, the new DATSD(CBD), Dr. Anna Johnson-Winegar, was briefed on the status of the BDRDAP EA. After a number of meetings, she issued a memorandum to the Assistant Secretary of the Army for Installations and Environment, dated 13 June 2000, supporting the expansion of the BDRDAP EA effort into an environmental impact statement of the chemical as well as biological defense program.
 - e. The scope of the program to be analyzed will include the six commodity areas (contamination avoidance, individual protection, collective protection, decontamination, medical defense, and modeling and simulation) of DoD's coordinated CBDP, over which the DATSD(CBD) has oversight responsibility and retains approval authority for all planning, programming, and budgeting documents, and the Defense Advanced Research Projects Agency's Biological Warfare Defense Program.

- f. The *CBDP PEIS* project, scheduled for completion in February 2003, will be executed under a USAMRMC contract with Science Applications International Corporation. The USAMRMC Environmental Coordinator, Dr. Robert Carton, serves as the Task Order Contracting Officer's Representative on this delivery order.
- g. The technical approach and public involvement activities for the *CBDP PEIS* will be directed and validated by an IPT formed by the DATSD(CBD). The IPT will be composed of senior personnel from DoD and the services and will be chaired by the Deputy Assistant Secretary of the Army (Environment, Safety, and Occupational Health). The Assistant Secretary of the Army for Acquisition, Logistics, and Technology will be the approval authority for the *CBDP PEIS*.

Charter
for the
Chemical and Biological Defense Program
Programmatic Environmental Impact
Statement
Integrated Product Team

February 2001

1. **PURPOSE.** This charter establishes and outlines the membership and responsibilities of the Integrated Product Team (IPT) for the Programmatic Environmental Impact Statement (PEIS) of the Chemical and Biological Defense Program (CBDP).

2. **REFERENCES.**

j. Joint Vaccine Acquisition Program Programmatic Environmental Assessment, (JVAP PEA), September 1997.

k. MEMORANDUM, Deputy Assistant to the Secretary of Defense for Counterproliferation and Chemical/Biological Defense, subject: Biological Defense Modernization Program Environmental Assessment, July 15, 1998.

l. MEMORANDUM, Deputy Assistant to the Secretary of Defense for Chemical and Biological Defense, subject: Chemical and Biological Defense Program Environmental Impact Statement, June 13, 2000.

m. MEMORANDUM, Deputy Assistant Secretary of the Army (Environment, Safety

Attachment B

and Occupational Health), subject: Chemical and Biological Defense Program Environmental Impact Statement (EIS), August 1, 2000.

n. MEMORANDUM, Assistant Secretary of the Army (Acquisition, Logistics and Technology), subject: Approval Authority for the Chemical and Biological Defense Research Program Environmental Impact Statement, December 12, 2000.

3. **SCOPE.** The CBDP PEIS IPT will function as an element of program management to prepare the necessary documentation and take the necessary actions to ensure NEPA compliance in the CBDP.

4. **OPERATION.**

a. Membership.

(1) Chair. Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health (ESOH)). The Chair will endeavor to reach full consensus on all issues but, if necessary, will call for a vote.

(2) Core Members. Designated representatives from the following organizations constitute the core membership of the IPT. Only core members will have a vote if one is required.

- Defense Advanced Research Projects Agency
- DoD Public Affairs Office
- DoD Office of General Counsel
- Office of the Assistant Secretary of the Army (Acquisition, Logistics & Technology)
- Office of the Assistant Secretary of the Navy (Research, Development & Acquisition)
- Office of the Deputy Assistant Secretary of the Air Force (ESOH)
- United States Marine Corps
- Army Public Affairs Office
- Army Office of General Counsel
- Joint Program Office for Biological Defense

- U. S. Army Medical Research and Materiel Command (USAMRMC)
- U. S. Army Test & Evaluation Command (ATEC)
- U. S. Army Soldier and Biological Chemical Command (SBCCOM)

(Upon approval from the core members, the IPT membership may be expanded to include other technology agencies/activities and materiel developers deemed appropriate.)

(3) Advisory Members. The following Army organizations will provide advice and assistance consistent with their areas of expertise.

- Office of the Deputy Assistant to the Secretary of Defense (Chemical and Biological Defense)
- Office of the Deputy Under Secretary of Defense (Environmental Security)
- Office of the Director for Environmental Policy
- Office of the Surgeon General
- Office of the Deputy Chief of Staff for Programs
- Office of the Judge Advocate General (Environmental Law Division)

b. The specific responsibilities and accountabilities of the IPT are outlined below.

(1) Direction to and validation of the technical approach for project execution, including

- Identifying representative sites.
- Identifying significant issues and impacts requiring analysis.
- Identifying an interdisciplinary team of internal/external experts, as necessary, to assist in conducting or validating analyses.
- Identifying alternatives.

(2) Direct stakeholder consultations.

(3) Planning for and the execution of public involvement activities in the

preparation of the CBDP PEIS, including responding to comments.

(4) Acquisition and review of data relevant to CBDP activities and facilities.

(5) In accordance with applicable statutory and regulatory requirements, staff and gain approval for all required documentation to include, but not limited to, the following.

- Notice of Intent.
- Notices of Availability.
- Draft and Final Environmental Impact Statements.
- Announcement and accomplishment of proposed public scoping, as applicable.
- Record of Decision.

c. Administration.

(1) The IPT Chair will establish the agenda for scheduled meetings no later than one week prior to a meeting.

(2) Any member of the IPT may submit proposed agenda items.

(3) The IPT Chair will obtain required support for IPT activities from the CBDP EIS contractor in coordination with the U.S. Army Medical Research and Materiel Command Task Order Contracting Officer's Representative (TOCOR).

(4) Minutes will be prepared for each meeting. A summary of action items, action agencies, and suspense dates will be prepared before the end of the meeting. Draft minutes of each meeting will be prepared and distributed to all members for staffing prior to final release.

(5) All action items from previous meetings will be reviewed to determine that the action is closed or adequate progress is being made toward resolution.

d. Use of Electronic Media.

(1) When appropriate and at the discretion of the IPT Chair, the review and/or staffing of any CBDP EIS document will be accomplished by utilizing a restricted access web site designed for this purpose (<http://CBDP-IPT.detrack.army.mil>). Approved documents and appropriate back-up material will be placed on a separate public web

site established for the CBDP EIS project (<http://ChemBioEIS.detrick.army.mil>).

(2) In addition, electronic meetings will be utilized when convenient and appropriate, as determined by the IPT Chair. Instructions and procedures for conducting electronic meetings will be prepared and distributed by the IPT Chair.

5. **TERM.** The terms of this Charter are in effect upon the date of the signature of the approval authority. They will remain in effect until completion of the CBDP EIS. No organization will terminate their participation in the IPT without first notifying the IPT Chair in writing at least 30 days in advance.

APPROVAL:

Raymond J. Fatz

DEPARTMENT OF DEFENSE

Department of the Army

Preparation of a Programmatic Environmental Impact Statement
(PEIS) on the Chemical and Biological Defense Program (CBDP)

AGENCY: U.S. Army Medical Research and Materiel Command, Department of
the Army, DoD.

ACTION: Notice of intent.

SUMMARY: The Department of the Army announces its intention to prepare
a PEIS that will assesses the potential

[[Page 29936]]

environmental impacts associated with the execution of the DoD CBDP
designed to protect our soldiers, sailors, marines, and airmen from the
evolving chemical and biological threats they may encounter on the
battlefield. The National Defense Authorization Act for Fiscal Year
1994 mandated the coordination and integration of all DoD CBDP. The
Army is the executive agent for the CBDP.

ADDRESSES: Written comments concerning the PEIS should be addressed to
Dr. Robert J. Carton, Environmental Coordinator, U.S. Army Medical
Research and Materiel Command, ATTN: MCMR-RCQ-E, 504 Scott Street, Fort
Detrick, MD 21702-5012.

FOR FURTHER INFORMATION CONTACT: Dr. Robert Carton at (301) 619-2004 or
by fax at (301) 619-6694.

SUPPLEMENTARY INFORMATION: The mission of the DoD CBDP is to provide
chemical and biological (CB) defense capabilities to allow the military
forces of the United States to survive and successfully complete their
operational missions in battlespace environments contaminated with CB
warfare agents. If our military forces are not fully and adequately
prepared to meet this threat, the consequences could be devastating.
The CBDP to support this mission comprises research, development and
acquisition activities. Each of the Military Services, the Joint
Program Office for Biological Defense, and the Defense Advanced
Research Projects Agency conduct CBDP activities. Some of these CBDP
activities necessarily involve the use of hazardous chemicals or
infectious disease agents for research, development, and production
purposes. The controls on and the potential environmental consequences
of such use both for the proposed action and for any reasonable
alternatives will be a primary focus of the CBDP PEIS.

The CBDP is divided into six commodity areas. Each commodity area

Attachment H

is managed by one of the Military Services and has an activity focus as follows:

(1) Contamination Avoidance (Army): Pursuit of technological advances in CB standoff detection, remote/early warning detection, sensor miniaturization, and improved detection sensitivity.

(2) Individual Protection (Marine Corps) and Collective Protection (Navy): Pursuit of technological advances that provide an individual with improved vision and voice capabilities, increased protection levels, and reduced heat stress over current individual protection equipment. Also the pursuit of technological advances that improve generic CB protective filters and fans, and advances that reduce the weight, volume, cost, logistics, and manpower requirements associated with providing individual and collective protection.

(3) Decontamination (Air Force): Pursuit of technological advances in sorbents, coatings, and physical removal, which will reduce logistics burden, manpower requirements, and lost operational capability associated with decontamination operations.

(4) Medical Protection (Army): Chemical defense efforts include development of pretreatment therapeutic drugs, diagnostic equipment and other life support equipment for protection against and management of chemical warfare agents. Biological defense efforts include development of vaccines, drugs, and diagnostic medical devices for protection against validated biological warfare agents to include bacteria, viruses, and toxins of biological origin.

(5) Modeling and Simulation (Navy): Efforts include meteorological models, transport and dispersion models, hazard and casualty assessment, computational fluid dynamics, hydrocodes, and constructive, live, and virtual simulation.

The activities take place at numerous military installations and contractor facilities throughout the United States. Details concerning the CBDP are contained in the "Chemical and Biological Defense Program, Annual Report to Congress, March 2000." This report may be downloaded in electronic format from the DoD web site at <http://www.defenselink.com>.

Although numerous environmental documents, dating back to the Final Programmatic Environmental Impact Statement on the Biological Defense Research and Development Program (April 1989), have been prepared analyzing the potential environmental consequences of various elements of the CBDP, no one document analyzes the potential environmental impacts of the full range of these activities. In keeping with the purposes of the National Environmental Policy Act, DoD has decided to prepare such a document in the form of a PEIS on the CBDP. This document will create an overarching framework that will continue to ensure fully informed Government decision making within this program and provide a single, up-to-date informational resource for the public.

Specifically, the PEIS will: (1) Update and expand current programmatic documentation, providing information on and analysis of the changes that have occurred in the biological defense program over the last decade; (2) enlarge the scope of the current programmatic documentation to include the chemical defense program; (3) provide a current programmatic NEPA document that will facilitate future Government decision making by allowing future environmental analyses under the CBDP to be tiered from it; and (4) share with the public the features of this program that demonstrate DoD's commitment to protect the environment and to ensure public safety during the execution of this operationally mandated program.

Proposed Action and Alternatives

The proposed action consists of the execution of an integrated

Attachment H

program designed to protect our soldiers, sailors, marines, and airmen from the evolving chemical and biological threats they may encounter on the battlefield. The No-Action alternative, continuation of current CBDP operations as described in and covered by existing environmental analyses will be evaluated, as well as all other reasonable alternatives identified during the public scoping process.

Scoping Process

Public comments are solicited concerning the environmental issues related to the CBDP. Scoping activities will be designed to facilitate public involvement. The scoping process supporting this effort will include: establishment of the public CBDP PEIS web site at <http://ChemBioEIS.detrick.army.mil>; dissemination of public information packages; publications in local newspapers; and coordination with public interest groups. Public meetings may be held if subsequently determined appropriate. These efforts will allow the public to provide input regarding the scope of the study and reasonable alternatives. To permit sufficient time for the U.S. Army to fully consider public input on issues, written or e-mail comments should be mailed or transmitted to ensure receipt prior to the end of the scoping period that will be identified on the CBDP PEIS web site. E-mail comments may be submitted via the CBDP PEIS web site at <http://ChemBioEIS.detrick.army.mil>.

Dated: May 29, 2001.

Raymond J. Fatz,

Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health), OASA (I&E).

CONGRESSIONAL INTEREST LIST
CHEMICAL/BIOLOGICAL DEFENSE PROGRAM
PROGRAMMATIC ENVIRONMENTAL IMPACT STATEMENT

Maryland: Senators Mikulski and Sarbanes, Congressmen Bartlett and Ruppertsberger

Ohio: Senators DeWine and Voinovich, Congresswoman Pryce

Texas: Senators Cornyn and Hutchison, Congressmen Gonzalez, Lampson and Rodriguez

Utah: Senators Bennett and Hatch, Congressman Bishop

Virginia: Senators Allen and Warner, Congresswoman Davis

the estimated annual cost to the public of this information collection will be about \$128,263.

C. Request for Comments

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

- Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;
- Whether the estimated burden of the proposed collection of information is accurate;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.

Dated: April 25, 2003.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-P

DEPARTMENT OF DEFENSE

Department of the Army

Notice of Availability of the Chemical and Biological Defense Program (CBDP) Draft Programmatic Environmental Impact Statement (DPEIS)

AGENCY: U.S. Army Medical Research and Materiel Command (USAMRMC), Department of the Army, DoD.

ACTION: Notice of availability.

SUMMARY: The Army has prepared a DPEIS covering the execution of an integrated CBDP designed to protect our soldiers, sailors, marines, and airmen from the evolving chemical and biological (CB) threats they may encounter on the battlefield. The DPEIS evaluates the potential environmental impacts associated with the execution of the DoD CBDP. The National Defense Authorization Act for Fiscal Year 1994 mandated the coordination and integration of all DoD CB defense programs. The Army is the executive agency for the CBDP.

DATES: The public comment period for the DPEIS will end 45 days after

publication of the Notice of Availability in the **Federal Register** by the U.S. Environmental Protection Agency.

ADDRESSES: Written comments or requests for copies of the DPEIS may be made to Ms. JoLane Souris, Environmental Coordinator, U.S. Army Medical Research and Materiel Command, Attn: MCMR-ZC-S, 504 Scott Street, Fort Detrick, MD 21702-5012 or visit the CBDP DPEIS Web site at <http://chembioeis.detrack.army.mil>.

FOR FURTHER INFORMATION CONTACT: Ms. JoLane Souris by calling (301) 619-2004 or by fax at (301) 619-6627.

SUPPLEMENTARY INFORMATION: The mission of the DoD CBDP is to provide CB defense capabilities to allow the military forces of the United States to survive and successfully complete their operational missions in battle space environments contaminated with CB warfare agents. If our military forces are not fully and adequately prepared to meet this threat, the consequences could be devastating. The CBDP to support this mission comprises research, development, and acquisition activities. Some of these CBDP activities necessarily involve the use of hazardous chemicals or infectious disease agents for research, development, and production purposes. The controls on and the potential environmental consequences of such use for both the proposed action and the alternative were primary focuses of the CBDP DPEIS.

The activities take place at numerous military installations and contractor facilities throughout the United States. Details concerning the CBDP are contained in the CBDP Annual Report to Congress, April 2002 at <http://www.acq.osd.mil/cp/reports.html>. The proposed action consists of the execution of an integrated CBDP designed to protect our soldiers, sailors, marines, and airmen from the evolving CB threats they may encounter on the battlefield. The no action alternative, continuation of current CBDP operations as described in and covered by existing environmental analyses, also was evaluated. No other alternatives were identified during the public scoping process.

Although numerous environmental documents dating back to the Biological Defense Research Program Final PEIS (April 1989) have been prepared analyzing the potential environment consequences of various elements of the CBDP, no one document analyzes the potential environmental impacts of the full range of CBDP activities. In keeping with the purposes of NEPA, DoD has now prepared such a document in the

form of the CBDP DPEIS. This document creates an overarching framework that will continue to ensure fully informed Government decision making within the CBDP and will provide a single, up-to-date information resource for the public.

Comments, including names and addresses of respondents, will be available for public review during regular business hours at the address shown in the **ADDRESSES** section of this Notice. Individual respondents may request confidentiality. If you wish to withhold your name and address from public review or disclosure, you must state this prominently at the beginning of your comment. Such requests will be honored to the extent allowed by law. Anonymous comments, however, will not be considered. All submissions from organizations or businesses and from individuals identifying themselves as representatives or officials of organizations or businesses will be made available for public inspection in their entirety.

Dated: April 28, 2003.

Raymond J. Fatz,

Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health) OASA/IS&E.

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Bonneville Power Administration

South Fork Flathead Watershed/ Westslope Cutthroat Trout Conservation Program

AGENCY: Bonneville Power Administration (BPA), Department of Energy (DOE).

ACTION: Notice of intent to prepare an Environmental Impact Statement (EIS).

SUMMARY: This notice announces BPA's intention to prepare an EIS on removal of all fish from selected lakes in the South Fork of the Flathead River drainage that harbor non-native species that threaten to genetically contaminate native fish in streams leading from those lakes, down into the South Fork Flathead River and Hungry Horse Reservoir. The specific lakes proposed for treatment are located in the Montana Counties of Flathead, Missoula, and Powell. This proposed action would take place within floodplains and waters located directly adjacent to and below the high water marks of these lakes.

DATES: Written comments are due to the address below no later than June 19,
